VIVEK KIRAR

COMPUTER SCIENCE ENGINEERING GRADUATE

+91 7389197972 Vivekkirar88@gmail.com

SUMMARY

Motivated and results-driven Computer Science and Engineer with a solid foundation in software development, data structures, algorithms, and programming languages such as Python, Java, and C++. Adept at problem-solving and critical thinking, with a passion for learning new technologies and applying them in real-world projects. Demonstrated experience in collaborative team environments, with excellent communication and leadership skills.

EDUCATION

M.Tech CSE MAY 2023 -MAY 2025
LNCT (bhopal) Indore Campus Affiliated by RGPV university
CGPA - 7.25

B.Tech CSE MAY 2018 -MAY 2022
Bansal Institute of Research and Technology Bhopal Affiliated by RGPV university
CGPA - 7.24

Higher Secondary 12th PCM MAY 2018
Mansarovar Academy vidisha (M.P Board)

Secondary 10th MAY 2016
Mansarovar Academy Vidisha (M.P Board)

STRENGTHS

- Observation
- communication
- Adaptable and proactive
- Decision Making
- Strong analytical skills

TECHNICAL SKILLS

- C++
- Dart
- Python
- Flutter
- Git & Github
- Firebase
- SQL
- Rest api

Tools

- Vs Code
- Visual Studio
- Android Studio

Computer Subjects

Oops, Data Structure, DBMS , Internet and web Technology,
Software Engineering

PROJECTS

Hyphn – E-commerce App for Headphones (Flutter + Firebase)
Role: Full Stack Mobile App Developer
Technologies: Flutter, Dart, Firebase, Firestore, Razorpay, REST API

- Designed and developed a modern, responsive Flutter e-commerce app focused on selling headphones with a mobile-first UI.

- Implemented key features: product listing, product details, shopping cart, Firebase authentication, and Razorpay UPI payment integration.
- Integrated cloud storage for dynamic image updates and Firestore for real-time product data.
- Added splash screen, custom sliders, gradient blur UI effects, and ensured mobile + web compatibility.
- Built a modular and scalable folder structure to support Firebase hosting deployment.

RESEARCH

Contextual Object Detection of Satellite Images Using Deep Learning
Role: Research Scholar (M.Tech Dissertation)
Institution: LNCT (Bhopal) Indore Campus
Technologies: Python, Deep Learning, CNN, YOLO, OpenCV, Image Processing, Remote Sensing
Description:

- Developed a deep learning–based framework for contextual object detection in satellite imagery using image preprocessing, segmentation, feature extraction, and classification.
- Applied image enhancement and denoising techniques to improve detection accuracy under varying atmospheric and lighting conditions.
- Evaluated modern deep learning approaches for satellite object detection and analyzed their performance for remote sensing applications.
- Published a review paper titled "A Review on Satellite Object Detection Using Machine Learning and Deep Learning Models" in IJIRT, Volume 04, Issue 10 (March 2026).

Key Achievements:

- Conducted research on AI-based satellite image analysis for object detection.
- Explored state-of-the-art deep learning models and image processing techniques for remote sensing.
- Contributed to academic research through an international journal publication.

This version is concise, ATS-friendly, and better suited for software, AI/ML, and research job applications.

HOBBY

- Painting digitally on Adobe photoshop
- Playing video games
- Playing badminton

PERSONAL DETAILS

Date of birth - 17/05/1999
Belong to - vidisha (M.P)
